# INDEX OF SUBJECTS

PAGE

*Actinomyces* species, comparative pathogenicity in mice . . . . . 465
Adhesion, bacterial, role in the pathogenesis of cholera . . . . . 43
Adhesion of *Candida albicans* to epithelial cells, effect of dietary carbohydrates . . . 511
Adhesion of type-III group-B streptococci to buccal epithelial cells . . . . . 363
Adhesion to intestinal mucosa, role of somatic antigen of *Vibrio cholerae* . . . . . 53
Anaerobic periurethral flora of healthy women and women susceptible to urinary-tract infection . . . . . 565
Antibody, virus, effect on infection of mouse brain by Mount Elgon bat virus. . . . 131

Bacteriocin typing scheme for *Bacteriodes* . . . . . 387
*Bacteriodes*, a bacteriocin typing scheme . . . . . 387
*Bacteroides asaccharolyticus* and *Bacteroides gingivalis*, cytotoxic activity . . . . . 253
*Bacteroides* causing impairment of opsonisation and phagocytosis of enterobacteria. . 351
*Bacteroides gingivalis* and *Bacteroides asaccharolyticus*, cytotoxic activity . . . . . 253
*Bacteroides* species, a reassessment of occurrence in the female genital tract . . . . 293
*Bacteroides* species, detection of species-specific and cross-reactive cell-surface antigens by indirect enzyme-linked immunosorbent assay . . . . . 223
BK virus, age-related changes in the prevalence of precipitating antibodies in infants and children . . . . . 285
BOOKS RECEIVED
Recombinant DNA (edited by K. J. Denniston and L. W. Enquist) . . . . . 149
The medical mycology handbook (Mary C. Campbell and Joyce L. Stewart) . . . 149
Microbial testers—probing carcinogenesis (edited by I. C. Felkener) . . . . . 150
The biochemistry and pharmacology of antibacterial agents (R. A. D. Williams and Z. L. Kruk) . . . . . 151
Manual of macrophage methodology: collection, characterisation and function (edited by H. B. Herscowitz, H. T. Holden, J. A. Bellanti and A. Ghaffar) . . . . . 151
Arboviruses in the Mediterranean countries (edited by Jelka Vesenjak-Hirjan, J. S. Porterfield and Erika Arslanagic) . . . . . 273
Isolation and identification of ringworm fungi (D. W. R. Mackenzie and C. M. Philpot) 273
Basic medical microbiology (R. F. Boyd and B. G. Hoerl) . . . . . 274
Systemic effects of HBsAg immune complexes (edited by E. Bartoli, L. Chiandussi and S. Sherlock) . . . . . 274
Microbiology for clinicians (R. N. Grüneberg) . . . . . 275
Adhesion and microorganism pathogenicity (edited by Katherine Elliot, Maeve O'Connor and Julie Whelan) . . . . . 275
Laboratory handbook of medical mycology (M. R. McGinnis) . . . . . 399
Antibiotic and chemotherapy (L. P. Garrod, H. P. Lambert and F. O'Grady) . . . 399
Microbiology of human skin (W. C. Noble) . . . . . 400
Notes on medical bacteriology (D. Sleigh and Morag C. Timbury). . . . . 677
Applied medical microbiology (J. G. Collee) . . . . . 677
*Haemophilus influenzae* (D. C. Turk) . . . . . 678
Genital infection by *Chlamydia trachomatis* . . . . . 678
Interferon 3 (edited by I. Gresser). . . . . 679
Comprehensive immunology. Part I: bacteria, mycoplasmae, chlamydiae and fungi (edited by A. J. Nahmias and R. J. Reilly) . . . . . 680
*Bordetella bronchiseptica*, virulence of isolates from pigs with or without atrophic rhinitis 105
*Bordetella pertussis*, detection of antibodies in human serum against the fimbrial haemagglutinin by enzyme-linked immunosorbent assay . . . . . 85
*Bordetella pertussis*, purification and characterisation of a fimbrial haemagglutinin for use in an enzyme-linked immunosorbent assay . . . . . 73
Breast-fed and formula-fed infants, microbial ecology of the large bowel during the first year of life. . . . . 189

Calcium requirement and virulence of *Yersinia enterocolitica* . . . . . 277
Campylobacters, sensitivity of thermophilic strains to R-type pyocines of *Pseudomonas aeruginosa* . . . . . 247

PAGE

*Candida albicans*, effect of dietary carbohydrates on in-vitro adhesion to epithelial cells 511
Cholera, role of bacterial adhesion in pathogenesis . . . . . 43
Cholera, role of somatic antigen of *Vibrio cholerae* in adhesion to intestinal mucosa . . 53
Chronic granulomatous disease, the action of cells from patients, on *Staphylococcus aureus* . . . . . 441
*Clostridium difficile*, inhibition by faecal streptococci . . . . . 569
*Clostridium perfringens*, isolation and properties of metronidazole-resistant mutants . . 503
Colonial variants of *Proteus* species: growth requirements, biochemical characters and resistance to antibacterial agents . . . . . 31
*Corynebacterium*, classification of species from axillary skin by numerical analysis of electrophoretic protein patterns . . . . . 485
Culture medium, complement-mediated killing of *Ureaplasma urealyticum* by antibody directed against components of . . . . . 135

Dental caries, immunisation of rhesus monkeys with *Streptococcus mutans*, *Lactobacillus acidophilus* and lipoteichoic acid for protection . . . . . 339
DNA analysis by bacterial restriction endonuclease for differentiation of subtypes of *Leptospira interrogans* . . . . . 331
Ducreyi-like bacillus; characterisation of an unusual bacterium isolated from genital ulcers . . . . . 97

Ecology, microbial, of the large bowel of breast-fed and formula-fed infants during the first year of life . . . . . 189
Enterobacteria, impairment of opsonisation and phagocytosis caused by enterobacteria 351
Enterococci, motility of strains isolated from the urinary tract and from other sources . 127
*Escherichia coli*, a biotyping scheme for subspecific discrimination . . . . . 233
*Escherichia coli*, cytotoxic activity of partially purified alpha haemolysin . . . . . 11
*Escherichia coli*, the role of alpha haemolysin in the virulence for mice . . . . . 23
*Escherichia coli* toxins, effect on mammalian cell lines . . . . . 531
*Escherichia coli*, virulence in ascending urinary-tract infection in mice . . . . . 303

Fallopian tubes, isolation and characterisation of two strains of *Herpesvirus hominis* type 1 from . . . . . 63
Fimbriae and haemagglutinins of *Morganella*, *Proteus* and *Providencia* . . . . . 551
Fimbrial haemagglutinin from *Bordetella pertussis*, purification and characterisation for use in an enzyme-linked immunosorbent assay . . . . . 73
Fimbrial haemagglutinin of *Bordetella pertussis*, detection in human serum by enzyme-linked immunosorbent assay . . . . . 85

Genital tract, female, a reassessment of the microbial flora with special reference to *Bacteroides* species . . . . . 293
Gonococcal antigens, detection by an indirect sandwich enzyme-linked immunosorbent assay . . . . . 541
Gonorrhoea, diagnosis by ELISA with polyvalent gonococcal antigen . . . . . 1
Gram-negative bacteria, characterised by rhodanese activity . . . . . 263
Gut colonisation, development in pre-term neonates . . . . . 519

Haemagglutinins and fimbriae of *Morganella*, *Proteus* and *Providencia* . . . . . 551
Haemolysin, alpha, of *Escherichia coli*, haemolytic activity . . . . . 11
Haemolysin, alpha, role in the virulence of *Escherichia coli* for mice . . . . . 23

Haemolysin produced by *Treponema hydrodysenteriae* . . . . . 205
*Haemophilus ducreyi*, identification in the clinical laboratory . . . . . 243
*Herpesvirus hominis* type 1, characterisation of two strains isolated from fallopian tubes 63

Immunity, effector cell-mediated, in mice immunised with *Salmonella* . . . . . 215

PAGE

*Klebsiella rhinoscleromatis*, bactericidal activity of serum against . . . . . 267

*Lactobacillus acidophilus*, *Streptococcus mutans* and lipoteichoic acid, immunisation of rhesus monkeys for protections against dental caries. . . . . 339
*Legionella pneumophila*, identification of antigens and antibodies by immunoferritin electronmicroscopy. . . . . 181
*Legionella pneumophila* infection in guinea-pigs, pathological and biochemical features. 317
*Leptospira interrogans*, differentiation of serovars *hardjo*, *balcanica* and *tarassovi* by bacterial restriction-endonuclease DNA analysis (BRENDA). . . . . 331
Leptospiral polysaccharide, evidence that it is not an important protective antigen . . 259
Leptospiral vaccines grown in protein-free medium, immunogenicity of . . . . . 493
Lipoteichoic acid, *Streptococcus mutans* and *Lactobacillus acidophilus*, immunisation of rhesus monkeys for protection against dental caries . . . . . 339

Metronidazole-resistant mutants of *Clostridium perfringens*, isolation and properties . 503
*Morganella*, *Proteus* and *Providencia*, haemagglutinins and fimbriae . . . . . 551
Motility of enterococci isolated from the urinary tract and from other sources . . . 127
Mount Elgon bat virus, effect of antibody on infection of mouse brain . . . . . 131
Mycobacteria, evaluation of rapid tests for identification. . . . . 575

*Neisseria meningitidis*, epidemiological value of lipopolysaccharide and heat-modifiable outer-membrane protein serotyping a group-A strains . . . . . 327
Numerical analysis of electrophoretic protein patterns for classification of *Corynebacterium* species from axillary skin . . . . . 485

Opacity factor of group-A streptococci. . . . . 451
Opacity factors of group-A streptococci, preparation of specific antisera . . . . . 153

PATHOLOGICAL SOCIETY OF GREAT BRITAIN AND IRELAND
Proceedings of 144th meeting . . . . . i (after 276)
Proceedings of 145th meeting . . . . . xv (after 592)
Penicillin, intraphagocytic protection of staphylococci from extracellular . . . . . 373
Phagocytic protection of staphylococci from extracellular penicillin . . . . . 373
Phagocytosis: the action of cells from patients with chronic granulomatous disease on *Staphylococcus aureus* . . . . . 441
*Proteus*, *Providentia* and *Morganella*, haemagglutinins and fimbriae . . . . . 551
*Proteus* species, colonial variants: growth requirements, biochemical characters and resistance to antibacterial agents . . . . . 31
*Providencia*, *Proteus* and *Morganella*, haemagglutinins and fimbriae . . . . . 551
*Pseudomonas aeruginosa* R-type pyocines, sensitivity of thermophilic campylobacters to 247

Quantitative methods for studies on vaginal flora . . . . . 141

Rhinitis, atrophic; virulence of *Bordetella bronchiseptica* isolated from pigs with or without. . . . . 105
Rhondanese activity: a simple and reliable taxonomic tool for gram-negative bacteria . 263
Rubella virus, a comparison of wild-type and RA27/3 strains by polyacrylamide-gel electrophoresis and radioimmune precipitation . . . . . 393

*Salmonella*, effector cell-mediated immune response in mice immunised with . . . . 215
Salmonella septicaemia, fatal, with disseminated intravascular coagulation and renal failure . . . . . 117

PAGE

Salmonellae of serogroup C1, identification by immunofluorescence and co-agglutination with antisera against an oligosaccharide-protein conjugate . . . . . 173
Septicaemia, salmonella, with disseminated intravascular coagulation and renal failure . 117
Skin bacteria; classification of *Corynebacterium* species from axillary skin by numerical analysis of electrophoretic protein patterns . . . . . 485
Staphylococci, intraphagocytic protection from extracellular penicillin . . . . . 373
*Staphylococcus aureus*, the action of cells from patients with chronic granulomatous disease on . . . . . 441
*Staphylococcus epidermidis*, changing resistance to antimicrobial drugs and resistance typing in clinically significant strains . . . . . 475
Steptococci, faecal, inhibition of *Clostridium difficile* . . . . . 569
Streptococci, group-A, opacity factor . . . . . 451
Streptococci, group-A, preparation of specific antisera to the opacity factors . . . . 153
Streptococci, Lancefield-group G, serotypes among strains isolated in Nigeria . . . . 123
Streptococci, motility of strains isolated from the urinary tract and from other sources . 127
Streptococci, type-III group-B, binding to buccal epithelial cells . . . . . 363
*Streptococcus mutans*, *Lactobacillus acidophilus* and lipoteichoic acid, immunisation of rhesus monkeys for protection against dental caries . . . . . 339
*Streptococcus pneumoniae*, changes in the serum of infected mice that stimulate in-vitro multiplication of virulent but not avirulent strains . . . . . 163
Sulphonamide-trimethoprim combinations; do they select less resistance to trimethoprim than the use of trimethoprim alone? . . . . . 403

*Treponema hydrodysenteriae*, studies on a haemolysin produced by . . . . . 205
Trimethoprim-sulphonamide combinations; do they select less resistance to trimethoprim than the use of trimethoprim alone? . . . . . 403

Ulcers, genital, characterisation of an unusual bacterium isolated from . . . . . 97
*Ureaplasma urealyticum*, complement-mediated killing by antibody directed against components of the growth medium . . . . . 135
Urinary-tract infection, anaerobic periurethral flora of healthy women and women susceptible to . . . . . 565
Urinary-tract infection in mice, virulence of *Escherichia coli* . . . . . 303

Vaginal flora, quantitative methods for study of . . . . . 141
*Vibrio cholerae*, role of somatic antigen in adhesion to intestinal mucosa . . . . . 53
*Vibrio cholerae* serotypes other than type 1, similarity of enterotoxins to cholera toxin and *Escherichia coli* heat-labile enterotoxin . . . . . 429

*Yersinia enterocolitica*, calcium requirement and virulence of . . . . . 277
